1. There is a Nigerian proverb that says, “It takes a whole village to raise a child.”
2. Infants and toddlers will be members of every co-op cluster.
3. At 4 months infants need to be fed a liquid (Weston Price formula) every 4 hours
4. At 6 months, infants need to be fed a liquid (Weston Price formula) every 6 hours.
5. At 12 months, infants can begin to eat soft baby food.
6. At 5 years of age, young children can begin to eat adult food.

**Infantino baby carrier (good reviews)**

**Musical mobile for baby cribs**

**Homemade baby formula**

**Glass baby bottles**

Clam-shaped Puj Flyte Compact Infant Bath (for use in a sink). Use Pears glycerin soap

18/10 stainless steel 2-quart sauce pan for warming milk with 2 drops of Thyme—or, sprigs of fresh Thyme (drain milk if you use fresh Thyme).

Children need 20 ounces of milk each day. Use Thyme once-a-day for 30 days to kill parasites (follow this regimen twice a year). Thyme has a pleasant taste.

Adults who are lactose intolerant have parasites (everyone can benefit from nutrition in milk).

Adults over 20 years of age should kill parasites with Neem iced tea.
