Team Minor: Week of June 7, 2015 #15 - Garbage Container Placement and Routine

Project Participants
The following group will be needed in this project:

- 4 Minor Men
- 4 Minor Women
- 4 Minor youths, age 12 or over

Need To Know Information About Garbage Collection
Recycling will not be addressed as part of garbage collection for three months. At launch, there is one type of 32-gallon garbage can planned for canopies. Later, colors will be needed for recycling.

Food Waste Suited for Vermiculture System
Coffee grounds, tea bags and egg shells are suitable food for the vermiculture trays. The following photos illustrates how an HDPE plastic water jug can be cut to carry these discarded items to the vermiculture towers in the hoop house. The photo on the right is a cut made to give a pet Spring water outside the clubhouse (use a hole punch to create a hole to hang the pet water dish on a gondola).

Large Garbage Cans: Canopy Areas, Clubhouse, Rec Centers and Sheds
Most of the large garbage cans accommodate 32-gallon liners. A grounds tour was suggested on the January 5, 2015 Activities page. See: http://baycolonyclub.weebly.com/week-of-january-5-2015.html
**Age 15 and Under Craft Project: Plastic Blank Insert Photo Fridge Magnet**
The plastic keychain frame in the photo below can be turned into a fridge magnet (with a cemented disk magnet). Photos can lined up along the top of small refrigerators under magnetized (laminated) labels such as “Garbage” “Pet Bath” and other tasks suited for youths. Placement of a photo under a task corresponds to a 1-week assignment. The youths who participate in this project will need to be trained how to remove a liner, secure the bag with a tie and move the bag(s) to trash room(s). They will also need to clearly understand what to do with recyclables.

**Bicycle Hitch**
Moving trash will require the use of an bicycle hitch (details will need to be worked out).
